

visiPad®TT and visiPad®XL series

visiPad®TT series

The visiPad®TT display series is the ultimate product line engineered from visiomatic. With its supreme modern design and technology, due to its "Through Touch" glass touch screen display, in-built microphone, in-built stereo loudspeakers, only 4 cm depth in over seven different screen sizes with same look, the visiPad®TT series can be perfectly integrated in interiors full of flair - for high esthetic performances. For even higher optical integration both display frame and external case can be individually personalized. for the external case and combine it with your

preferred RAL-color on the display frame, or just use the same material or color for both case and frame! All design wishes can be realized to produce your own personal desire. The toughened coated safety glass on the entire surface will protect even the most delicate materials. A simplified cable connection with power supply is optionally available. With this, just two dedicated CAT5e* cables guaranties for more comfort and flexibility in your installation – for best image quality and perfect integration with the visiomatic Home System.

visiPad®XL series

For the ones who don't know any view restriction and pretend the best design integration in their homes, visiomatic realized the visiPad®XL series. Invented by visiomatic for the best interior's integration, with its wide screen and the toughened, coated, safety glass, the XL series of the visiPad® can also be personalized in design following all your wishes. Just combine external case and display frame in colors and materials and

enjoy the vivacity of the top image quality combined with one of the slimmest TFT displays in the world! Ideal for wall mounting. In the CAT5-version, no extra efforts for cabling, just power supply and two dedicated CAT5e* cables. The visiPad®XLs are the perfect solution - in extra large wide screen - to work with the visiomatic Home System and its centralized digital video storage and video distributing system.
